GitHub || Linkend || Portfolio

Skills:

- **Comfortable**: JavaScript, ES6, React, Node.js, Rest API, MongoDB, Bootstrap4, React Bootstrap, JSON, HTML, HTML5, CSS3.
- **Familiar**: Redux, TypeScript, Express.js, Material-UI.
- **Tools**: Github, VS Code, Notepad++, Chrome Dev Tools, Heroku, Netlify, Firebase, Postman.

Projects:

1. Two-wheeler-repair: GitHub Client side || GitHub Server Side || Live Side

- Here you can take service.
- You can order service from here.
- All services are protected by private route.
- So, you have to log in when you want any services.
- Here you also can add payment.
- Here you can add your review also

Technology: VScode, firebase, Heroku, github

2. BD-Shop: GitHub Client Side || GitHub Server Side || Live site

- Here people can buy product.
- Before buying you have to log in. For log in I use here firebase log in process.
- The data which you show here all load from backend.
- To work with back End I use mongodb.
- Here you can add product also.

Technology: VScode, firebase, Heroku, github.

3. Dev-Town: Github || Live Site (team project)

- Learn more about your favourite Developer.
- Create a Team with Pro developers.
- Add developer in car.
- Add or Remove developer from cart price will be adjusted.
- Created with React Redux.

Technology: VScode, Netlify, github.

4. SpaceX: GitHub || Live Site

This project is so much exciting for me because, this is the 1st time when I work for a company. So, I had got little bit knowledge how to work with a company. I think this knowledge will help to develop my knowledge about a company.

- This is my 1st project to work with a company.
- Here I use 3 API to complete it.
- Here you can filter data by year.
- you can also filter data by landing status.
- you can also filter data by launching status

Technology: VScode, netlify, github.

5. Champion League: GitHub Client side || live side

- This is a dynamic project.
- Here you can select a team.
- The team which you select you got the individual team information.
- The team is formed by male or female you got the idea by dynamic picture

Technology: VScode, github

6. Temperature meter: GitHub || Live site

- You can find the weather of any city you want to see
- Here I use vanilla JavaScript
- Weather is loaded by rest API.

Technology: VScode,github

Education:

B.Sc in Computer Science and Engineering (7th semester) World University OF Bangladesh.
